Warmup Frost Protection Cable

Overview

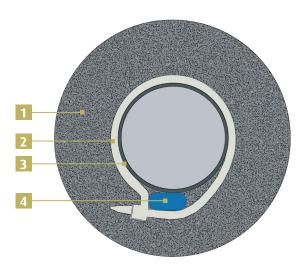

The Warmup Frost Protection Cable is designed to prevent pipes from cracking or bursting due to adverse weather conditions. It is suitable for heating plastic or metal pipes down to temperatures as cold as -20°C.

The thermistor ensures protection against frost as it will not activate the heating cable until the ambient temperature falls below $+5^{\circ}$ C and will switch off once temperatures exceed $+15^{\circ}$ C. The relatively large switching band ensures the entire pipe warms up and supply to the heater will only be stopped when the temperature exceeds 15° C.

The cable is fitted to the underside of the pipe and secured using aluminium tape or plastic cable ties. Plastic pipes will have to be wrapped with aluminium foil before the cable is applied to improve heat spread. Fitting a 20mm layer of heat resistant foam insulation around the pipe is also recommended to improve performance.

- 1 Insulation
- 2 Cable Ties
- 3 Pipe
- 4 Frost Protect Cable

- 5 Aluminium Tape
- 6 Thermistor
- 7 Coldtail
- 8 Plug

Features

- Thermistor accurately controls the cable temperature between +5° to +15°C. No need for an extra controller
- The cable is 100% Waterproof and protects down to temperatures as low as -20°C
- Installation is quick and easy with the cable being cable tied or secured using aluminium tape to either plastic or metal pipes
- Available in a variety of lengths from 1m 60m
- 10 Year Warranty

Technical Specifications

TECHNICAL DATA - Frost Protection Cable					
OPERATING VOLTAGE	220 - 240v: 50Hz				
IP RATING	IPX7				
COLOUR	BLUE				
THICKNESS	9mm				
THERMISTOR REGULATION	+5 to +15°C				
OUTPUT RATING	10W/m				
CONNECTION	2m LONG "COLDTAIL" CONNECTION
